Investors for Climate

Dear Sir/Madam,

CMM invites you to the third annual Mongolia Investment Forum: Singapore 2026, where Mongolia meets global capital.

Mongolia stands at a defining juncture. As the nation charts its course toward sustained, diversified growth, the choices being made today in capital markets, energy, and infrastructure will shape its trajectory for decades to come. A growing presence in international bond markets, an ambitious pipeline of infrastructure projects, and a steady shift toward cleaner energy are opening new avenues for investment, creating a compelling moment for international investors to look closer.

Returning to Singapore for the third consecutive year, the forum keeps fixed income at the core of its agenda while broadening the conversation to the energy transition, infrastructure development, and the macroeconomic trends shaping Mongolia's outlook. It brings together industry leaders, issuers, and institutional investors for substantive, forward-looking discussions on how global capital can drive Mongolia's next stage of growth.

Theme: Fixed income, energy transition, and infrastructure.
